## inside + x = ÷ mathematics

## **Inside Problem Solving**

## **Courtney's Collection**

## **Level B**

Courtney has a bank of pennies, nickels, and dimes.	How many different	ways can Courtney	pick three coins
out of her bank? Show all the ways you can find.			

What are the different amounts of money Courtney would have by picking any three coins?

How do you know you found all the possible ways?

Explain your answer.
